

Target AB40i

Degreasing Additive for Acid Pickling Solutions

Description	A liquid additive for acid pickling solutions, enabling them to also become degreasing solutions.
Features	<ul style="list-style-type: none">• Enables pickling solution to remove and emulsify a variety of oils and greases.• Improves the rate of removal of scales and oxides.• Contains a highly effective inhibitor system to restrict base metal attack and reduce hydrogen embrittlement.• Creates an additional cleaning stage, so reducing the risk of oil carry-over.• Produces a foam blanket to minimise fuming.• For use in pickling solutions based on hydrochloric or sulphuric acid.• Ideal for use prior to phosphating or electroplating operations.• Can be used by either rack or barrel application.
Product Code	TARG/AB40i .
SG	0.98 ± 0.1 kg/l at 20°C.
Initial Fill	Add 30 litres of AB40i per 1000 litres of the acid pickle solution.
Operation	Target AB40i is used at a concentration of 2 - 5% (v/v) in the acid pickle solution. After initial make up, additions of AB40i should be made pro-rata with addition of acid.
Shelf Life	2 years from date of manufacture when correctly stored in unopened containers.
Storage	The product should be stored in cool, dry, frost-free conditions, in sealed containers.
Health & Safety	Refer to the product's Safety Data Sheet and safety advice on the product label before use.
Technical Support	For technical support in using this product, please contact: e: birminghamtech@trimite.com , or t: 0121 554 7000.
Date of Issue	Feb 2022.
